PROFESSIONAL SUMMARY

Full-Stack Software Developer with over 1 year of experience designing, developing, and maintaining responsive, accessible, and scalable web applications. Skilled in frontend development using React.js, Next.js, JavaScript, TypeScript, HTML5, CSS3, Tailwind CSS, and Bootstrap, with hands-on experience building reusable UI components, improving performance, and delivering mobile-responsive, cross-browser user experiences. Strong backend foundation in Python, Django, REST APIs, GraphQL, SQL, MySQL, PostgreSQL, and MongoDB, with the ability to support API development, database operations, and client-server integration. Experienced with Git/GitHub, Agile/Scrum, debugging, deployment troubleshooting, technical documentation, and problem-solving. Passionate about building reliable, maintainable, and user-focused software solutions across the full development lifecycle.

TECHNICAL SKILLS

Programming Languages: HTML5, CSS3, Python, JavaScript (ES6+), TypeScript, SQL

Backend Technologies: Django, Django REST Framework, MySQL, PostgreSQL, MongoDB

Frontend Technologies: React.js, Next.js, Responsive Web Design, Tailwind CSS, Bootstrap, CSS Flexbox, CSS Grid

API Integration: REST APIs, GraphQL, JSON, Axios

Version Control & Development Tools: Git, GitHub, VS Code, npm, Yarn, Postman

Methodologies: Agile (Scrum), Test-Driven Development (TDD), Code Review, Debugging & Troubleshooting

Soft Skills: Problem Solving, Team Collaboration, Communication, Attention to Detail, Time Management

RELEVANT EXPERIENCE

Technical Associate (Full-time)

Jun 2025 – Present

Sutherland Global Services

Windsor, Ontario

- Delivered frontline IT support in a ticket-based environment, resolving software, endpoint, IP, and network connectivity issues for 160+ users per week, reducing downtime and supporting uninterrupted business operations.
- Diagnosed and restored PCs, applications, peripherals, and connectivity issues through step-by-step troubleshooting, improving first-contact resolution by 75% and helping users regain productivity within 10 minutes on average.
- Documented recurring incidents, troubleshooting workflows, and knowledge-base articles for software, endpoint, and network issues, reducing repeat handling time by 20%.
- Escalated complex service-impacting incidents to engineering teams with accurate diagnostics, logs, and issue summaries, improving handoff quality and reducing resolution delays by 23%.

Full Stack Developer (Remote Part-time)**Jan 2025 – Jun 2025****Q4E Institute****Edmonton, Alberta**

- Developed and maintained accessible platform features using Next.js, Django, Tailwind CSS and REST APIs, improving system usability for 750+ users while supporting stable application performance.
- Supported platform users with environment setup, software installation, deployment troubleshooting, and permissions-related issues across all the teams, improving access reliability and reducing onboarding delays by 33%.
- Maintained documentation for setup procedures, release workflows, and troubleshooting steps, standardizing technical knowledge across 10+ processes and reducing repeat support requests by 50%.

Software Engineer (Full-time)**Aug 2022 – Jul 2023****Graaho Technologies****Dhaka, Bangladesh**

- Developed and enhanced responsive web interfaces using HTML, CSS, JavaScript, TypeScript, NextJS, Bootstrap, and modern frontend development practices, ensuring cross-browser compatibility and mobile responsiveness.
- Collaborated with cross-functional teams to integrate frontend applications with RESTful APIs, delivering dynamic and data-driven user experiences.
- Optimized application performance through efficient state management, API handling, and frontend code improvements, reducing response times by 25%.
- Worked in an Agile Scrum environment, contributing to feature development, testing, deployments, and 50+ successful production releases.
- Participated in debugging frontend and backend issues, performing root-cause analysis and maintaining reliable application performance with 99.9% uptime.
- Assisted in backend development using Python Django, PostgreSQL, MySQL, supporting API development and database operations when required.
- Used Git for version control, collaborative development, and code management across multiple projects.

EDUCATION**University of Windsor****Windsor, ON****Master of Applied Computing****Sep 2023 – Dec 2024****United International University****Dhaka, Bangladesh****Bachelor of Computer Science & Engineering****May 2016 – Oct 2020**
